Subject Index

Acidity
Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties 1
Acidic ferrierite type zeolite. II. Steamed and acid leached treatment 21
Adsorption of pyridine and ammonia on heteropoly compounds and catalytic activity in the methyl t-butyl ether synthesis reaction 45
Activation
Activation of copper–cerium intermetallic catalyst precursors by temperature-programmed oxidation 291
Adsorption
Adsorption of pyridine and ammonia on heteropoly compounds and catalytic activity in the methyl t-butyl ether synthesis reaction 45
Measurement of active phase dispersion in molybdenum sulfide/carbon catalysts using toluene chemisorption 93
Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties 1
Effect of partial reduction on the formation of oxygenated compounds in the hydrogenation of carbon monoxide on rhodium/alumina 105
Effect of catalyst preparation on catalytic activity. VII. The chemical structures on nickel/alumina catalysts: their impact on the formation of metal–support interactions 229
Ageing
Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties 1
Aldol condensation
Formation of 2-ethyl acrolein by gas phase aldol condensation 315
Alkaline earth oxides
Hexane–carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate 217
Ammonia adsorption
Adsorption of pyridine and ammonia on heteropoly compounds and catalytic activity in the methyl t-butyl ether synthesis reaction 45
Ammoxidation
Kinetic study of the ammoxidation of methylpyrazine to cyanopyrazine 305
Antimony–vanadium–manganese oxides/alumina
Kinetic study of the ammoxidation of methylpyrazine to cyanopyrazine 305

Barium oxide
Hexane–carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate 217
Benzoic acid oxidation
Oxygen spillover and its possible role in coke burning 247
Bisphenol A synthesis
Kinetics of the synthesis of bisphenol A 129

Calcium oxide
Hexane–carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate 217
Carbon dioxide hydrogenation
Hydrogenation of carbon dioxide over Co-$AlPO_4$-5 115
Carbon dioxide shift-reaction
Combination of ethylbenzene dehydrogenation and carbon dioxide shift-reaction over a sodium oxide/alumina catalyst 207
Carbon monoxide hydrogenation
Catalytic hydrogenation of carbon monoxide to alkenes over partially degraded iron complexes. I. Unsupported iron catalysts 35
Effect of partial reduction on the formation of oxygenated compounds in the hydrogenation of carbon monoxide on rhodium/alumina 105
Carbon monoxide oxidation
Application of laser diagnostic techniques to the catalytic oxidation of carbon monoxide in a tubular wall reactor 259
Catalyst characterization
Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties 1
Acidic ferrierite type zeolite. II. Steamed and acid leached treatment 21

Adsorption of pyridine and ammonia on heteropoly compounds and catalytic activity in the methyl t-butyl ether synthesis reaction 45
Mössbauer and X-ray studies of the structure of iron–manganese oxide catalyst precursors 57
Temperature-programmed reduction of mixed iron–manganese oxide catalysts in hydrogen and carbon monoxide 75
Measurement of active phase dispersion in molybdenum sulfide/carbon catalysts using toluene chemisorption 93
Electrochemically controlled deposition–precipitation of copper/silica catalysts 175
Electrochemically controlled deposition–precipitation of copper–nickel/silica 189
Combination of ethylbenzene dehydrogenation and carbon dioxide shift-reaction over a sodium oxide/alumina catalyst 207
Parameters affecting the optimal synthesis of zeolite ZSM-20 273
Surface properties of co-precipitated V-Ti-O catalysts and their relation to the selective oxidation of isobutene 323
Amorphous nickel–phosphorus alloy deposited on a support and its hydrogenation activity 339

Catalyst preparation
Catalytic hydrogenation of carbon monoxide to alkenes over partially degraded iron complexes. I. Unsupported iron catalysts 35
Mössbauer and X-ray studies of the structure of iron–manganese oxide catalyst precursors 57
Hydrogenation of carbon dioxide over Co-$AlPO_4$-5 115
Formation of ethene and propene from methanol on zeolite SZM-5. II. Preparation of finished catalysts and operation of a fixed-bed pilot plant 155
Electrochemically controlled deposition–precipitation of copper/silica catalysts 175
Electrochemically controlled deposition–precipitation of copper–nickel/silica 189
Combination of ethylbenzene dehydrogenation and carbon dioxide shift-reaction over a sodium oxide/alumina catalyst 207
Effect of catalyst preparation on a catalytic activity. VII. The chemical structures on nickel/alumina catalysts: their impact on the formation of metal–support interactions 229
Parameters affecting the optimal synthesis of zeolite ZSM-20 273
Activation of copper–cerium intermetallic catalyst precursors by temperature-programmed oxidation 291
Formation of 2-ethyl acrolein by gas phase aldol condensation 315
Surface properties of co-precipitated V-Ti-O catalysts and their relation to the selective oxidation of isobutene 323
Amorphous nickel–phosphorus alloy deposited on a support and its hydrogenation activity 339

Catalyst shape
Formation of ethene and propene from methanol on zeolite ZSM-5. II. Preparation of finished catalysts and operation of a fixed-bed pilot plant 155

Cobalt/aluminophosphate
Hydrogenation of carbon dioxide over Co-$AlPO_4$-5 115

Coke formation
Hexane–carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate 217
Effect of catalyst preparation on catalytic activity. VII. The chemical structures on nickel/alumina catalysts: their impact on the formation of metal–support interactions 229
Oxygen spillover and its possible role in coke burning 247

Copper–cerium
Activation of copper–cerium intermetallic catalyst precursors by temperature-programmed oxidation 291

Copper–nickel/silica
Electrochemically controlled deposition–precipitation of copper–nickel/silica 189

Copper/silica
Electrochemically controlled depositi-on–precipitation of copper/silica catalysts 175

Dispersion
Oxygenate formation over supported platinum with different dispersions and the effect of additives 345

Electrochemical deposition
Electrochemically controlled deposition-precipitation of copper/silica catalysts 175
Electrochemically controlled deposition-precipitation of copper-nickel/silica 189
Ethylbenzene dehydrogenation
Combination of ethylbenzene dehydrogenation and carbon dioxide shift-reaction over a sodium oxide/alumina catalyst 207

Ferrierite
Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties 1
Acidic ferrierite type zeolite. II. Steamed and acid leached treatment 21

Heteropoly compounds
Adsorption of pyridine and ammonia on heteropoly compounds and catalytic activity in the methyl t-butyl ether synthesis reaction 45
Hexane-carbon dioxide reaction
Hexane-carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate 217
Hexane cracking
Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties 1
Hydrogenation
Catalytic hydrogenation of carbon monoxide to alkenes over partially degraded iron complexes. I. Unsupported iron catalysts 35
Measurement of active phase dispersion in molybdenum sulfide/carbon catalysts using toluene chemisorption 93
Effect of partial reduction on the formation of oxygenated compounds in the hydrogenation of carbon monoxide on rhodium/alumina 105
Hydrogenation of carbon dioxide over Co-$AlPO_4$-5 115
Amorphous nickel-phosphorus alloy deposited on a support and its hydrogenation activity 339
Hydrotreating catalysts
Measurement of active phase dispersion in molybdenum sulfide/carbon catalysts using toluene chemisorption 93

Ion-exchange catalysts
Kinetics of the synthesis of bisphenol A 129
Iron
Catalytic hydrogenation of carbon monoxide to alkenes over partially degraded iron complexes. I. Unsupported iron catalysts 35
Iron-manganese oxide
Mössbauer and X-ray studies of the structure of iron-manganese oxide catalyst precursors 57
Temperature-programmed reduction of mixed iron-manganese oxide catalysts in hydrogen and carbon monoxide 75
Iron (III) oxide
Oxygen spillover and its possible role in coke burning 247
Isobutene partial oxidation
Surface properties of co-precipitated V-Ti-O catalysts and their relation to the selective oxidation of isobutene 323

Kinetics
Kinetics of the synthesis of bisphenol A 129
Hexane-carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate 217
Application of laser diagnostic techniques to the catalytic oxidation of carbon monoxide in a tubular wall reactor 259
Parameters affecting the optimal synthesis of zeolite ZSM-20 273
Kinetic study of the ammoxidation of methylpyrazine to cyanopyrazine 305

Magnesium oxide
Hexane-carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate 217
Metal-support interaction
Effect of catalyst preparation on catalytic activity. VII. The chemical structures on

nickel/alumina catalysts: their impact on the formation of metal–support interactions 229
Methanol Conversion
Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties 1
Formation of ethene and propene from methanol on zeolite ZSM-5. I. Investigation of rate and selectivity in a batch reactor 139
Formation of ethene and propene from methanol on zeolite ZSM-5. II. Preparation of finished catalysts and operation of a fixed-bed pilot plant 155
Methanol synthesis
Activation of copper–cerium intermetallic catalyst precursors by temperature-programmed oxidation 291
Oxygenate formation over supported platinum with different dispersions and the effect of additives 345
Methylpyrazine ammoxidation
Kinetic study of the ammoxidation of methylpyrazine to cyanopyrazine 305
Molybdenum sulfide/carbon
Measurement of active phase dispersion in molybdenum sulfide/carbon catalysts using toluene chemisorption 93
Mössbauer-effect spectroscopy
Mössbauer and X-ray studies of the structure of iron–manganese oxide catalyst precursors 57

Nickel/alumina
Effect of catalyst preparation on catalytic activity. VII. The chemical structures on nickel/alumina catalysts: their impact on the formation of metal–support interactions 229
Nickel–phosphorus
Amorphous nickel–phosphorus alloy deposited on a support and its hydrogenation activity 339

Oxygen spillover
Oxygen spillover and its possible role in coke burning 247
Oxygenate formation
Oxygenate formation over supported platinum with different dispersions and the effect of additives 345

Partial oxidation
Surface properties of co-precipitated V-Ti-O catalysts and their relation to the selective oxidation of isobutene 323
Partial reduction
Effect of partial reduction on the formation of oxygenated compounds in the hydrogenation of carbon monoxide on rhodium/alumina 105
Platinum/alumina
Oxygen spillover and its possible role in coke burning 247
Application of laser diagnostic techniques to the catalytic oxidation of carbon monoxide in a tubular wall reactor 259
Oxygenate formation over supported platinum with different dispersions and the effect of additives 345
Pyridine adsorption
Adsorption of pyridine and ammonia on heteropoly compounds and catalytic activity in the methyl t-butyl ether synthesis reaction 45

Regeneration
Effect of catalyst preparation on catalytic activity. VII. The chemical structures on nickel/alumina catalysts: their impact on the formation of metal–support interactions 229
Oxygen spillover and its possible role in coke burning 247
Rhodium/alumina
Effect of partial reduction on the formation of oxygenated compounds in the hydrogenation of carbon monoxide on rhodium/alumina 105

Selectivity
Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties 1
Acidic ferrierite type zeolite. II. Steamed and acid leached treatment 21
Catalytic hydrogenation of carbon monoxide to alkenes over partially degraded iron complexes. I. Unsupported iron catalysts 35
Effect of partial reduction on the formation of oxygenated compounds in the hydrogenation of carbon monoxide on rhodium/alumina 105

Hydrogenation of carbon dioxide over Co-$AlPO_4$-5 115
Formation of ethene and propene from methanol on zeolite ZSM-5 I. Investigation of rate and selectivity in a batch reactor 139
Formation of ethene and propene from methanol on zeolite ZSM-5. II. Preparation of finished catalysts and operation of a fixed-bed pilot plant 155
Combination of ethylbenzene dehydrogenation and carbon dioxide shift-reaction over a sodium oxide/alumina catalyst 207
Formation of 2-ethyl acrolein by gas phase aldol condensation 315
Surface properties of co-precipitated V-Ti-O catalysts and their relation to the selective oxidation of isobutene 323
Oxygenate formation over supported platinum with different dispersions and the effect of additives 345

Sintering
Mössbauer and X-ray studies of the structure of iron–manganese oxide catalyst precursors 57
Oxygen spillover and its possible role in coke burning 247

Sodium oxide/alumina
Combination of ethylbenzene dehydrogenation and carbon dioxide shift-reaction over a sodium oxide/alumina catalyst 207

Strontium oxide
Hexane–carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate 217

Styrene hydrogenation
Amorphous nickel–phosphorus alloy deposited on a support and its hydrogenation activity 339

Surface area
Amorphous nickel–phosphorus alloy deposited on a support and its hydrogenation activity 339

Temperature-programmed desorption
Effect of catalyst preparation on catalytic activity. VII. The chemical structures on nickel/alumina catalysts: their impact on the formation of metal–support interactions 229

Temperature-programmed oxidation
Activation of copper–cerium intermetallic catalyst precursors by temperature-programmed oxidation 291

Temperature-programmed reduction
Temperature-programmed reduction of mixed iron–manganese oxide catalysts in hydrogen and carbon monoxide 75
Electrochemically controlled deposition-precipitation of copper/silica catalysts 175
Electrochemically controlled deposition-precipitation of copper–nickel/silica 189

Tungsten oxide
Oxygen spillover and its possible role in coke burning 247

Tungsten oxide/silica
Formation of 2-ethyl acrolein by gas phase aldol condensation 315

Two-dimensional reactor model
Application of laser diagnostic techniques to the catalytic oxidation of carbon monoxide in a tubular wall reactor 259

Vanadium oxide
Oxygen spillover and its possible role in coke burning 247

Vanadium oxide/titanium oxide
Surface properties of co-precipitated V-Ti-O catalysts and their relation to the selective oxidation of isobutene 323

Zeolites
Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties 1
Acidic ferrierite type zeolite. II. Steamed and acid leached treatment 21
Formation of ethene and propene from methanol on zeolite ZSM-5. I. Investigation of rate and selectivity in a batch reactor 139
Formation of ethene and propene from methanol on zeolite ZSM-5. II. Preparation of finished catalysts and operation of a fixed-bed pilot plant 155
Parameters affecting the optimal synthesis of zeolite ZSM-20 273

ZSM-5 Zeolite
Formation of ethene and propene from methanol on zeolite ZSM-5 I. Investiga-

tion of rate and selectivity in a batch reactor 139
Formation of ethene and propene from methanol on zeolite ZSM-5. II. Preparation of finished catalysts and operation of a fixed-bed pilot plant 155
ZSM-20 zeolite
Parameters affecting the optimal synthesis of zeolite ZSM-20 273

applied catalysis

AN INTERNATIONAL JOURNAL DEVOTED TO CATALYTIC SCIENCE AND ITS APPLICATIONS

VOL. 37, NO. 1–2 **CONTENTS** **FEBRUARY 15, 1988**

(Abstracts/Contents Lists published in API Abstracts/Catalysts & Catalysis, Chemical Abstracts, Current Contents/Physical, Chemical & Earth Sciences, Current Contents/Engineering, Technology & Applied Sciences, Engineering Index, Metals Abstracts, Science Citation Index, Theoretical Chemical Engineering Abstracts, Automatic Subject Citation Alert and SCISEARCH)

Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties
Y.S. Jin, A. Auroux and J.C. Vedrine (Villeurbanne, France) 1

Acidic ferrierite type zeolite. II. Steamed and acid leached treatment
Y.S. Jin, A. Auroux and J.C. Vedrine (Villeurbanne, France) 21

Catalytic hydrogenation of carbon monoxide to alkenes over partially degraded iron complexes. I. Unsupported iron catalysts
R. Snel (Pretoria, South Africa) 35

Adsorption of pyridine and ammonia on heteropoly compounds and catalytic activity in the methyl t-butyl ether synthesis reaction
J.-S. Kim, J.-M. Kim, G. Seo and N.-C. Park (Kwangju, Korea) and H. Niiyama (Tokyo, Japan) 45

Mössbauer and X-ray studies of the structure of iron–manganese oxide catalyst precursors
B. Kolk and A. Albers (Johannesburg, South Africa) and I.R. Leith and M.G. Howden (Pretoria, South Africa) 57

Temperature-programmed reduction of mixed iron-manganese oxide catalysts in hydrogen and carbon monoxide
I.R. Leith and M.G. Howden (Pretoria, South Africa) 75

Measurement of active phase dispersion in molybdenum sulfide/carbon catalysts using toluene chemisorption
G.M.K. Abotsi, A.W. Scaroni and F.J. Derbyshire (University Park, PA, U.S.A.) 93

Effect of partial reduction on the formation of oxygenated compounds in the hydrogenation of carbon monoxide on rhodium/alumina
D. Duprez, J. Barrault and C. Geron (Poitiers, France) 105

Hydrogenation of carbon dioxide over Co-$AlPO_4$-5
R.A. Migone, M.A. Ulla, E.A. Lombardo and J.O. Petunchi (Santa Fe, Argentina) 115

Kinetics of the synthesis of bisphenol A
K. Jeřábek, J. Odnoha and K. Setínek (Prague, Czechoslovakia) 129

Formation of ethene and propene from methanol on zeolite ZSM-5. I. Investigation of rate and selectivety in a batch reactor
D. Prinz and L. Riekert (Karlsruhe, F.R.G.) 139

Formation of ethene and propene from methanol on zeolite ZSM-5. II. Preparation of finished catalysts and operation of a fixed-bed pilot plant
U. Hammon, M. Kotter and L. Riekert (Karlsruhe, F.R.G.) 155

(continued overleaf)

(contents continued)

Electrochemically controlled deposition–precipitation of copper/silica catalysts
P.C.M. van Stiphout, A.J. van Dillen and J.W. Geus (Utrecht, The Netherlands) 175

Electrochemically controlled deposition–precipitation of copper–nickel/silica
P.C.M. van Stiphout, C.R. Bayense and J.W. Geus (Utrecht, The Netherlands) 189

Combination of ethylbenzene dehydrogenation and carbon dioxide shift-reaction over a sodium oxide/alumina catalyst
S. Sato, M. Ohhara, T. Sodesawa and F. Nozaki (Chiba, Japan) 207

Hexane–carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate
M. Matsukata, S. Sekine, K. Kobayashi, E. Kikuchi and Y. Morita (Tokyo, Japan) 217

Effect of catalyst preparation on catalytic activity, VII. The chemical structures on nickel/alumina catalysts: their impact on the formation of metal–support interactions
Y.-J. Huang and J.A. Schwarz (Syracuse, NY, U.S.A.) and J.R. Diehl and J.P. Baltrus (Pittsburgh, PA, U.S.A.) 229

Oxygen spillover and its possible role in coke burning
E. Baumgarten and A. Schuck (Düsseldorf, F.R.G.) 247

Application of laser diagnostic techniques to the catalytic oxidation of carbon monoxide in a tubular wall reactor
W.A. England (Didcot, U.K.), A. Gilmore (Bath, U.K.), D.A. Greenhalgh (Didcot, U.K.), W.J. Thomas and U. Ullah (Bath, U.K.) and S.T. Whittley (Didcot, U.K.) 259

Parameters affecting the optimal synthesis of zeolite ZSM-20
N. Dewaele, L. Maistriau, J.B. Nagy, Z. Gabelica and E.G. Derouane (Namur, Belgium) 273

Activitation of copper–cerium intermetallic catalyst precursors by temperature-programmed oxidation
C.M. Hay and J.R. Jennings (Middlesbrough, U.K.), R.M. Lambert and R.M. Nix (Cambridge, U.K.), G. Owen (Runcorn, U.K.) and T. Rayment (Cambridge, U.K.) 291

Kinetic study of the ammoxidation of methylpyrazine to cyanopyrazine
L. Forni (Milan, Italy) 305

Formation of 2-ethyl acrolein by gas phase aldol condensation
G. Albanesi and P. Moggi (Parma, Italy) 315

Surface properties of co-precipitated V-Ti-O catalysts and their relation to the selective oxidation of isobutene
J.L.G. Fierro, L.A. Arrua, J.M. Lopez Nieto and G. Kremenic (Madrid, Spain) 323

Short communications

Amorphous nickel–phosphorus alloy deposited on a support and its hydrogenation activity
D. Jingfa and Z. Xiping (Shanghai, Peoples Republic of China) and M. Enze (Beijing, Peoples Republic of China) 339

Oxygenate formation over supported platinum with different dispersions and the effect of additives
L. Guczi, G. Stefler, K. Matusek and I. Bogyay (Budapest, Hungary) and S. Engels, H. Lausch, L. Schuster and M. Wilde (Merseburg, G.D.R.) 345

News Brief
Advances in catalytic technology 352
Meeting on inorganic membranes 352
Some recent papers 352
Recent Chem Comms on methane coupling 353
Chinese Journal of Catalysis 353
Professor R.B. Anderson 353
Award for Alfons Baiker 354
The Periodic Table 354
Catalysis Letters 354
IUPAC manuals on catalyst characterization 355
Organic reactions catalysis conference 355
